

# INVERTERS

The Sungrow is a versatile and reliable inverter designed for residential and small commercial solar systems.

Known for its high efficiency, durability, and reliability, it converts up to 98.2% of DC to AC electricity.

# INVERTERS

Three-phase string series inverters not only are diversified products providing optional DC switch, integrated DC combiner box, optional PID protection module, and wireless communication, which can match the requirements of different customers but also can support 10% rated overload which can efficiently decrease initial investment of the system.

# INVERTERS

Solax inverters have carved a niche in the solar energy sector, offering homeowners and businesses a reliable way to optimize their solar investment. Known for advanced technology and solid performance, Solax products cater to a diverse market with a focus on sustainability and energy independence.

The Solis is a budget friendly, high-efficiency inverter designed for residential solar systems. It converts up to 97.8% of DC to AC electricity & is easy to install and maintain. Solis is a reputable brand offering reliable & efficient solar inverters in Pakistan.

# INVERTERS

Plug & play, pick power within the inverter, no external power needed, easy to install. IP65 water-proof design, resistant to bad weather, enhanced stability.
